PRE-PRESS

High Resolution Digital Color Scans

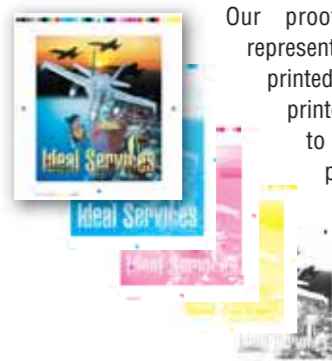

You don't have to look any further for great color scans. From your transmissive or reflective artwork (35mm to 8½" x 14") Ideal Services achieves high-quality digital color with resolution up to 3200 dpi and the dynamic range your work demands. And, with our quick turnaround and competitive pricing, we're the *ideal* choice for all your scanning needs. So if it's consistent, high-quality color you demand, don't settle for anything but the best.

Graphics/Prepress Team

Our design and prepress department is staffed with friendly, skilled professionals and equipped with the latest in computers, software, scanning, proofing and computer-to-plate hardware to save you time and money up front. We will design your projects using current applications and provide you with a final file format that works best for you. Our prepress team will perform a preflight technical review on all incoming files to check for imaging readiness, fonts, links, colors, proper document size and bleeds to help prevent any unwanted surprises on press. We also handle all of your trapping and imposition needs for jobs being printed here.

Color Proofing Department

Color-managed digital proofs are truly the most accurate means of prepress proofing in a computer-to-plate workflow. The same files used for imaging plates are used to create composite contract proofs.

Our proofs are the closest representation of what your final printed job will look like when printed on our press, either to uncoated or coated paper. We also offer a variety of digital proofing solutions from high end inkjet to digital color and black & white printers.

LARGE FORMAT

Giant Color Digital Output

Our large format printers provide superb color and black & white output at incredibly affordable prices. Giant color digital output is perfect for short-run posters, signage, displays, banners, floor graphics, window displays, point of purchase, special events, mock ups, training materials, trade shows, conferences, presentations, maps and much, much more!

Large Format Drymounting & Laminating

We offer quick one- and two-sided lamination in 3 mil, 5 mil, 10 mil, glossy, lustre or matte finishes, up to 48" x 96". Ideal can flush- or float-mount your posters, prints, artwork, maps, photographs, signage, wall hangings, etc., to gatorfoam, foamcore, PVC and many other substrates up to one-half inch thick, in sizes up to 48" x 96". Our normal turnaround time is 3 days. Rush services are available.

Large Format Roland Print & Cut

Our top-of-the-line printer/cutter combines unrivaled six-color printing with precision contour cutting. Our capabilities in printing, cutting, ink, media and RIP technology make it *ideal* for all types of advanced wide format applications. You can choose from a wide variety of coated and uncoated banner medias, adhesive backed vinyls, papers, films, and fine art materials. Whether you're printing fine art or outdoor banners, you're assured of brilliant color and excellent durability up to three years outdoors without lamination. Prints up to 1440 dpi. For fine art and photo quality we print at 2880 dpi.

MORE SERVICES

**Graphic Design • Typesetting • Production • Illustration
Line Art Scanning • Gray Scale Scanning**

From your raw copy and pictures to a final finished product, Ideal Services does it all!

OFFSET & DIGITAL PRINTING

Offset Printing

Quality offset with our 20" x 26" four-color sheet-fed press at up to 64000 8½" x 11" pages per hour. This is a real production workhorse. With auto plate changing, blanket clean-up & ink drive, this system is so efficient, make-ready times are cut by as much as 75%, thus saving you time & money! With this efficiency, and our complete in-house prepress capability, we're very competitive on short as well as long runs.

Digital Color Printing Redefined

With a broad media latitude, the DocuColor sheet-fed digital press lets us produce a broader range of products. This means we can say "yes" to more than ever before. The ability to handle extra-heavy stocks (280 gsm), a sheet size of up to 12.6" x 19.2" (12" x 18" with bleed) means we can produce short-run full-color brochures, post cards, business cards, data sheets and much more. And we can do it all in a shorter, "on-demand" period of time. There are no plates, make-ready or film, a big cost savings to you! Every piece is a digital original... the quality is amazing.

Digital Black & White Printing

Blazing speed: 6300 pph print/copy mode, 6180 pph scanning mode. The digital printer has a multitude of finishing options: half-fold booklet-making, gatefold, letter fold-in, letter fold-out, double parallel fold, Z-fold and 2-hole or 3-hole drilling in line. Our digital printer will withstand the highest-volume document jobs with the toughest delivery times. With our professional production team, we have the competitive edge.
